It must be possible for the riders to complete the course (from the paddock to all sections and back) without the use of public roads (unless closed for general traffic with permission from the authorities and guarded by police or officials).

To be classified as a finisher the rider alone shall ride or push his machine for the entire distance of the Course unless the organizers have authorized other assistance or authorized deviation.

TL 01.3.1 Distance

The length of the course for each lap shall not exceed 20 km.

The Trial shall consist of 3 laps for Championship men, women, Junior & youth classes, a minimum of 2 laps for the +40, +60 and other classes.

TL 01.3.2 Course marking

The course shall be marked with arrows as shown below or using ribbon that are similar to the ribbons used in the sections. If the organizer chooses to use ribbons they will still have to make some number markings there where this is necessary.

Within the square mark there shall be written the number of the section to which the arrow directs the riders. All markers must be made of waterproof material.

During the event the marked route must be strictly followed. A rider who leaves the route must, under penalty of disqualification, regain the course at the point where he left it.

The course shall be marked the day before the event and the riders will be allowed to follow it by motorcycle under their own responsibility during the scheduled inspection of the sections (see TL 01.7.1).

For safety reasons, there shall wherever possible, be a route marked for spectators, which is different to that marked for the riders.

TL 01.4 SECTIONS

The number of sections shall be between 10-12 per lap.

For each class the sections must be designed so that at least 1/3 are of an easy, medium and difficult level. Each section shall be completely independent of other sections. Sections constructed predominantly with industrially processed elements or materials should be avoided and can eventually be abandoned by the jury. Each section must be clearly numbered in consecutive order and the rider must, under penalty of 10 points, attempt the sections in numerical order. Each section shall have signs clearly identifying the location of both the "Section Begins" and "Section Ends". The Sections must be numbered at the time of the Rider's inspection. A machine is considered as being in a section when the front wheel spindle has passed the "section begins" sign and until the time when the front wheel spindle passes the "Section ends" sign.

The color codes for the various classes are as follows:

Championship class, Red

Championship class Women, organizer is free to choose a color separate from other classes.

Championship class Junior, Blue

Championship class Youth, Green.

Class Over 40+, Green

Class Over 60+, organizer is free to choose a color separate from other classes.

International classes, organizer is free to choose a color separate from other classes.

Where it is found necessary to abandon any section owing to "force majeure" before all riders have passed through then no penalties shall be incurred in this section by any rider.

If there are riders in the queue for this section, then the queue should be formed in the same order at the next section. The total time for the event shall not be modified in the event of any section being abandoned during the Trial.

If any section proves during the first lap to be impossible for all riders (all 5 points) that section shall not be modified for the next lap but may be abandoned at the conclusion of the lap. The penalties incurred by any rider in the section shall be included in that rider's total penalty points for the event.

TL 01.4.1 Section Boundaries

The sections shall be bounded by natural obstacles and strong, easily visible waterproof tape, securely fastened to stakes or trees.

The stakes must be securely fixed to the ground and be spaced close enough to each other to prevent major movement of the tapes. The tape must be at a minimum height of 10 cm above the ground and below a maximum height 30 cm. The actual width of the section defined between the tapes shall be at least 200 cm.

When a tape is used as an external limit of a section or as an internal separation within a section, then the following shall apply. Breaking the tape or passing over a tape so that a wheel touches the ground on the opposite side shall be considered as a failure.

The actual width of the section may be reduced using "gates" indicated by markers, as shown below, with the minimal width between these markers being 120 cm.

The Arrows within the gates shall be colored red for the Championship Class blue for the Junior Class.

Riders in all classes must travel only between the

"gates" for their Class. A rider who passes between the "gates" of another Class – in whatever direction irrespective of if used that day – will be classed as a failure i.e. 5 points.

If any tape or any marker or stake is broken or moved, then it must be replaced before the passage of the next rider. The Clerk of the Course must ensure that there is an adequate reserve supply of tape and markers available at each section.
